PROJECTS

E-Commerce Website (07/2022 - 01/2023)

- The e-commerce website I built using NodeJS and MongoDB provided a user-friendly interface, secure transactions, and essential shopping features. It effectively enabled users to browse, select, and purchase products in a seamless and secure manner.

Jados Website (11/2019 - 05/2020)

- Designed and developed a dynamic scholarship website using HTML5, CSS3, JavaScript, Node.js, and MongoDB. The website catered specifically to the needs of students seeking scholarships.
- The well-designed user interface contributed to a 25% increase in user engagement and a 15% boost in conversions, indicating improved user satisfaction and successful interaction with the website.

Face Detection (03/2021 - 11/2021)

- Created a face detection app using ReactJS and the Clarifai API, developed an intuitive user interface that allowed users to upload images for analysis.
- Integrated the powerful face detection capabilities of the Clarifai API to accurately identify and highlight faces in uploaded images, provided real-time feedback to users, enabling them to visualize and locate faces within the images.
