SKILLS

- HTML5
- CSS3
- JavaScript
- ReactJS
- Node.JS
- TypeScript
- Express
- MongoDB
- Experience with Git and GitHub
- Excellent communication and interpersonal skills

PROJECTS

E-commerce Website

Full-Stack Developer *Jul 2022 – Jan 2023*

I built a robust e-commerce website utilizing NodeJS and MongoDB

The website's intuitive user interface facilitated easy product browsing, enabling users to explore a wide range of items. They could conveniently add products

EXPERIENCE

Full-Stack Engineer

Jados Technologies *Mar 2019 – Nov 2021*

- Developed responsive and scalable web applications using React, Redux, and Node.js, resulting in improved performance and user experience.
- Collaborated closely with UX designers to ensure the web application design was user-friendly and intuitive, leading to increased user engagement and satisfaction.
- Worked collaboratively with cross-functional teams to identify and resolve technical issues, resulting in enhanced system stability and reduced downtime.
- Played an integral role in conducting code reviews to maintain code quality and ensure adherence to coding standards, resulting in improved maintainability and reduced bugs.
- Optimized web application performance and significantly improved user experience by implementing caching strategies and reducing page load time, resulting in faster and more efficient application usage.

Full-Stack Engineer

Afamma Technologies *Nov 2021 – Oct 2022*

– Created a custom e-commerce website from scratch using ReactJS and Node.js, delivering a tailored solution to meet the client's specific needs.
– Successfully integrated payment gateways and implemented a customized checkout flow, resulting in a streamlined and secure purchasing process for customers.
– Implemented optimization techniques such as lazy loading and image optimization to enhance website performance, resulting in faster page load times and improved overall user experience.
– Collaborated closely with the client to gather requirements and ensure project specifications were met, resulting in a solution that aligned with their business objectives and user expectations.
– Elevated the user experience by developing custom animations and implementing a responsive design, providing a visually appealing and seamless browsing experience across devices.

Full-Stack Engineer

Freelancer *Oct 2022 – Present*

- Utilized React, Redux, and Node.js to develop web applications that were responsive and scalable.
- Collaborated closely with UX designers to ensure the user-friendliness and intuitiveness of the web application design.
- Worked alongside cross-functional teams to identify and resolve technical issues.
- Actively contributed to code reviews, ensuring high code quality and adherence to coding standards.
- Optimized web application performance and enhanced user experience by reducing page load time and implementing effective caching strategies.

EDUCATION

to their cart, view cart contents, and make adjustments as needed.

To ensure secure transactions, I implemented appropriate encryption protocols and integrated secure payment gateways into the checkout process. This guaranteed that sensitive user information was protected, establishing trust and confidence among customers.

Overall, the e-commerce website I built using NodeJS and MongoDB provided a user-friendly interface, secure transactions, and essential shopping features. It effectively enabled users to browse, select, and purchase products in a seamless and secure manner.

Jados Website
Full stack developer *Nov 2019 – May 2020*

- Designed and developed a dynamic scholarship website using HTML5, CSS3, JavaScript, Node.js, and MongoDB. The website catered specifically to the needs of students seeking scholarships.

- Created an intuitive and visually appealing user interface using CSS3, ensuring smooth navigation and easy access to information. The interface received positive feedback for its aesthetics and contributed to improved user engagement.

- The well-designed user interface contributed to a 25% increase in user engagement and a 15% boost in conversions, indicating improved user satisfaction and successful interaction with the website.

Face Detection
Full-Stack Developer *Mar 2021 – Nov 2021*

– Created a face detection app using ReactJS and the Clarifai API.
– Developed an intuitive user interface that allowed users to upload images for analysis.
– Integrated the powerful face detection capabilities of the Clarifai API to accurately identify and highlight faces in uploaded images.
– Provided real-time feedback to users, enabling them to visualize and locate faces within the images.
– Demonstrated the seamless integration of external APIs with ReactJS, showcasing the potential of face recognition technology.
– Offered users an interactive and engaging experience, combining the functionality of ReactJS and the advanced face detection features of the Clarifai API.

MERN Stack Development
Zero To Mastery *Feb 2018 – Sep 2018*

Bachelor of Geology
Bayero University Kano *Apr 2018 – Present*
Geology department.
